**Summary of Legislation:** This bill provides a refundable credit against a taxpayer's state tax liability for property taxes paid on inventory. The bill provides that the credit is initially equal to 20% of property taxes paid on inventory, and increases the credit percentage over five years until the credit may be claimed for 100% of property taxes paid on inventory.

**Effective Date:** January 1, 1999 (retroactive).

**Explanation of State Expenditures:** The Department of Revenue will have additional administrative expenses related to the updating the tax forms and monitoring this tax credit.

**Explanation of State Revenues:** This bill creates a business inventory tax credit based on a certain percentage of property taxes paid on inventory. The applied percentages and corresponding tax years are identified below along with the estimated revenue loss for the respective fiscal years.

The credit may be taken against the taxpayer's liability under the corporate gross income tax, adjusted gross income tax, supplemental net income tax, bank tax, savings and loan association tax, insurance premium tax, and the financial institution tax. If the amount of the credit exceeds the taxpayer's liability, they may carry forward the excess in subsequent years or it may be refunded. A taxpayer is not entitled to a carryback of any

unused credit. If a pass through entity does not have an income tax liability, the credit may be taken by the shareholder(s) or partner(s) in relation to their distributive income in which they are entitled from the pass through entity.

The tax credits would continue to grow in tax years 2003 and years after. Tax revenue from the various taxes noted above are deposited in the General Fund and the Property Tax Replacement Fund.
